

Wing Bench with Jatoba Wood Seat | Care & Maintenance

The Jatoba wood seat is shipped in a natural, unfinished state. This wood innately requires little or no maintenance. If you wish to maintain the wood's natural color, routine application of teak oil or another colorless wood protection oil is recommended. Depending on the climate, this should be done once or twice a year. Water and a soft brush may be used to remove persistent dirt.

We strongly advise you not to use a high-pressure hose, as this will roughen the wood's smooth surface and irreparably damage the wood's fibers.
