

Wheelies® Care Guide

The Wheelies frames are extruded aluminum with an anodized finish which requires no maintenance other than normal cleaning and dusting. For best results use a glass cleaner and soft cloth .

Avoid abrasive cleaners.

Optional Avonite top Cleaning: Soap and water will remove most stains. Use a polishing compound such as 3M Perfect-It and a soft cloth to remove more resistant stains.

Painted Surfaces: Clean with a damp cloth using mild non-amoniated cleanser. Rinse the cloth thoroughly and dry. Do not use an abrasive cleanser as it will scratch the finish.

Case interiors need only to be dusted.

No maintenance required for hardware.
