---

UHF Wireless Synchronized Clock System

The UHF Wireless Synchronized Clock System uses a single master clock, equipped with either an NTP, GPS or CDMA receiver.

The system obtains and transmits the correct US Time Standard to an unlimited number of secondary clocks, throughout a facility or an entire campus. This system eliminates potential liabilities from inaccurate, independently set clocks. Automatic Daylight Savings Time adjustments. Emergency Mass Notification (EMN) options may be added to these Master Clocks to instantly notify the occupants of an entire facility. (See page 98.)

Master Clock Specifications
UHF FM Transmitter included on all Master Clocks
5, 25, 70, 100 and 200-watt models available
Automatic Daylight Savings Time adjustments
Antenna included
Accurate to a fraction of a second over 10 years
Operating Temperature: 32°F - 120°F
Humidity: 0 - 95% non-condensing
Display
Real-time hours, minutes, and seconds displayed
Hour & Minutes 2.5” high, Seconds 1.8” high
6 digits, 7 segment red LED display
Visible up to 75 feet
70 user-defined display formats
12 or 24-hour format
Site plan/surveys are available to help determine your exact needs. Contact the factory.

Time Zones
11 Daylight Savings Time parameters
144 incremental time zone settings

Alarms
Wired and wireless alarms available
Network accessibility from anywhere
15 day of week variables
Alarm scheduling software with 990 alarm settings

Power Requirements
120V AC, 60Hz internal transformer (included). UL listed wall ‘plug-in’ type. 10-year lithium battery back-up

* An FCC License is required for all UHF Master Clocks. Export of this system from the United States of America is prohibited.

** Internet service is required and not included with the PPP Wireless Synchronized Time System.
2.4 GHz Wireless Synchronized Clock System

The 2.4 GHz Wireless Synchronized Time System provides a multi-path mesh network for clock-to-clock transmission of synchronized time, eliminating the time related issues and liabilities associated with manual time setting.

This easy-to-install system will provide years of trouble free service without the cost of expensive wiring. The master transmitter obtains time updates from a network timeserver or optional GPS receiver. The time signal is then broadcast to all clocks once per second. Automatic Daylight Savings Time adjustments. Each battery-operated clock transmits up to 150 feet in all directions, repeating the synchronized time signal clock-to-clock, throughout an entire facility.

### Master Clock Specifications
- 2.4 GHz Transmitter included on all master clocks. No FCC License required.
- Our standard 2.4 GHz transmitter is sufficient for most single commercial building construction.
- Each battery-operated clock transmits up to 150 feet in all directions, repeating the synchronized time signal clock-to-clock, throughout an entire facility. All clocks receive and re-broadcast time updates once per second, creating a Multi-path mesh network. However, depending on construction, layout and features, repeaters may be required.
- Automatic Daylight Savings Time adjustments. A Mini Master is included with every master clock. It can be used to confirm signal coverage, as an accurate time source for installing analog clocks or as a temporary repeater.
- Site plan/surveys are available to help determine your exact needs. Contact the factory.
- Ethernet connector supplied for NTP time acquisition. Simultaneous GPS acquisition permitted with Wireless GPS receiver.
- Accurate to a fraction of a second over 10 years. Operating temperature: 32°F - 120°F Humidity: 0-95% non-condensing
- Time Zones
  - Multiple LED time zone models available.
  - Contact Factory.
- Alarms
  - Using a wireless relay the 2.4 GHz System can be used to activate mechanical bells or horns. Can activate any combination of 12 alarm zones.
- Power Requirements
  - 110V AC.
  - UL listed wall ‘plug-in’ type. 10-year lithium battery back up.

### Options
- 10 year lithium battery pack
- SyncTech® Electric Movement, 120V AC, 60Hz with battery backup

Specifications

- SyncTech® Clock: 10½” dia. with red second hand behind clear glass. 23”w x 12½”h.
- Clock Panel Finish: any PPP Color or laminate.
- Sliding clock panel for easy maintenance.
- Hardwood trim and laminate sides in PPP Wood Finish.
- Glass Writing Surface: Flush mounted, tempered ½” thick safety glass with white back: 23”w x 31”h.
- Card retainer each side for displaying cards and notes.
- Markers and eraser stow in side holders located on either side. 4 dry erase markers & eraser included.
- Mounting cleat/bracket and hardware included.
- Standard 5 year lithium battery pack (UHF Models), 5 year alkaline battery pack (2.4GHz Models).
- For optional 10 year lithium battery pack or electric movement, See pages 96 - 97.
The UHF Emergency Mass Notification System (EMN) will instantly send text and/or audio messages throughout a facility or across an entire campus in a matter of seconds, and not minutes.

The same emergency messages can also be delivered to your entire facility utilizing the facility emergency dialing software. Using the latest text-to-speech technology from AT&T, the UHF system will send out alpha-numeric messages to all Wireless Message Displays, Wireless Speakers and Outdoor Broadcast Systems. To reduce costs, our system can be integrated into most PA and Fire Panel systems and utilize existing speakers, or combinations of both.

How does it work? UHF EMN Software ties into the URL that broadcasts the RSS feed supplied by the paging software. When an alert is sent from the paging software, the UHF EMN Software automatically sends out an audio alert to all UHF speakers and a text alert to all message displays.

When an “all clear” is sent from the paging software, the UHF EMN Software automatically changes the message displays back to time.

**Benefits of Wireless Emergency Notification**

- Uses a FCC Licensed frequency not accessible to the general public.
- Audio and Visual notifications in the event of an emergency.
- NFPA 72 recommended Amber strobe lights on indoor speakers and moving message boards.
- Over 60 professionally recorded emergency announcements to choose from.
- Easily integrates into fire control panels to utilize system speakers.
- Up to 15 pre-recorded emergency messages that provide calm, concise announcements.
- Make live emergency announcements from any telephone, cell phone or SyncTech® master control PC.
- Text to speech technology using AT&T Natural Voices Software.
- Ability to have back up master transmitter in the event of a catastrophic failure at the primary location.
- Plug and Play components for easy installation and expansion.
- Ability to divide facility or campus into 255 separate zones.
- Synchronized time for your entire facility or campus.

**Emergency Moving Message Display**
Synchronized Time, Date, Day of Week or one line of text for Emergency messages. 2”h digit display with black ABS case

**WC200EMN**
EMN message display with speaker and strobe Dot Matrix Amber Color

Note: although the signal is wireless, the LED’s require 120V AC, 60Hz power to illuminate this clock. Other sizes available including 2, 3 or 4 lines of text. Please submit your requirements.

**WCIDPA**
Wireless indoor PA speaker (requires 120V AC, 60Hz for power)

**WCODPA**
Wireless outdoor PA speaker (requires 120V AC, 60Hz for power)

**Additional SyncTech® Information**
- Only a small portion of the Emergency Mass Notification options are shown above.
- In most cases, a site plan/survey may be required for proper specifications of your system, prior to a formal quote being issued.
- Due to the number of options and user interfaces available, please contact Customer Service for Ordering Details.

2. Model
## Technical Specifications

<table>
<thead>
<tr>
<th>Feature</th>
<th>SyncTech® UHF</th>
<th>SyncTech® 2.4 GHz</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Master Clock</strong></td>
<td>UHF FM Transmitter included. 25, 70, 100 and 200-watt models available. Antenna included.</td>
<td>2.4 GHz transmitter included on all master clocks. A Mini Master is included with every master clock. It can be used to confirm signal coverage, as an accurate time source for installing analog clocks or as a temporary repeater.</td>
</tr>
<tr>
<td><strong>Time Sources</strong></td>
<td>NTP GPS CDMA</td>
<td>NTP GPS CDMA NTP + GPS receivers can be used in single or simultaneous configurations.</td>
</tr>
<tr>
<td><strong>Accuracy</strong></td>
<td>Accurate to a fraction of a second over 10 years.</td>
<td>Accurate to a fraction of a second over 10 years.</td>
</tr>
<tr>
<td><strong>Operating Temperature</strong></td>
<td>32°F - 120°F.</td>
<td>32°F - 120°F.</td>
</tr>
<tr>
<td><strong>Operating Humidity</strong></td>
<td>0 - 95% non-condensing.</td>
<td>0 - 95% non-condensing.</td>
</tr>
<tr>
<td><strong>FCC License Requirements</strong></td>
<td>Required.</td>
<td>No license required.</td>
</tr>
<tr>
<td><strong>Power Requirements (Master Clocks)</strong></td>
<td>120V AC, 60Hz internal transformer (included). UL listed wall ‘plug-in’ type. 10-year lithium battery back-up.</td>
<td>110V AC, internal transformer (included). UL listed wall ‘plug-in’ type. 10-year lithium battery back up.</td>
</tr>
<tr>
<td><strong>Time Zones</strong></td>
<td>11 Daylight Savings Time parameters. 144 incremental time zone settings.</td>
<td>–</td>
</tr>
<tr>
<td><strong>Emergency Message Notification Capability</strong></td>
<td>• Moving Message Displays. • Speakers.</td>
<td>–</td>
</tr>
<tr>
<td><strong>Typical Installation</strong></td>
<td>• Facility with additional need for Emergency Mass Notification capabilities.</td>
<td>• Single building construction with receiver clocks placed within 150’ radius of one another.</td>
</tr>
<tr>
<td></td>
<td>• Multi-building campus requiring a single time source.</td>
<td>• Facility without need for integrated Emergency Mass Notification.</td>
</tr>
<tr>
<td><strong>Site Survey</strong></td>
<td>A site plan/survey is available to help determine your exact needs. Contact the factory.</td>
<td></td>
