  - **Zone 2:** @ 5% of LIST
  - **Minimum Truck Charge:** $160

### Slalom Modular Partition System

- **The Slalom Modular Partition System consists of multiple panels spanning between aluminum uprights for dividing and defining space.**
- **Slalom** can be configured into a series of curves, straight runs and corner partitions with up to 4 intersecting panels per upright. **Slalom** provides a stable yet easily re-configurable partition system.

* Optional Guaranteed Freight Program (see PeterPepper.com for details).

**To Order Specify**
1. Quantity of each Panel
2. Model, and Panel Finish
   - EcoTex panels can be customized in all Pantone colors and digital graphics with no minimum quantity.
   - Additional EcoFlex Trevira CS fabric colors and Felt are available with non-standard lead times, at the same price.
   - Please contact factory for lead time and availability.

**Specifications**
- Panel Finishes: Fireproof, self-extinguishing PVC, EcoPanel, EcoWood, EcoTex and EcoFlex; Micro-Perforated Steel.
- Standard Panel Size: 39”w x 21½’h.
- Panel curvature is determined by moving the uprights closer or farther apart.
- PVC: ½” thick panels deliver virtually unlimited curvature from 0° to 360°.
- PVC Striped Translucent: white, 2” wide, screened onto translucent PVC panel.
- Steel panels are semi-flexible with the minimum radius of approximately 24”.
- Model FHP - Full Height Single PVC Panel. May be ordered in place of three vertical panels.
- Panels are connected with translucent plastic clips.
### Acoustic Panel Selections - Rigid, Non-Flexible

EcoStrong panels are rigid, non-flexible, sound absorbent panels. Ideal for areas requiring more stability; can be configured in straight runs and perpendicular intersections. EcoStrong panels are ecologically friendly and produce good acoustic correction of midrange frequencies and attenuation of high frequencies. EcoStrong panels are finished in Trevira CS, EcoFelt and PETfelt fabrics. Panels are flame retardant and recyclable. NRC Rating = 0.79 (see page 141 for details). Fire rating: CL1; Smoke: F1. Trevira CS: Class 1.

---

**NRC – Noise Reduction Coefficients**

The Noise Reduction Coefficient (NRC) is a scalar representation of the amount of sound energy absorbed upon striking a particular surface. An NRC of 0 indicates perfect reflection; an NRC of 1 indicates perfect absorption. In particular, it is the average of four sound absorption coefficients of the particular surface at frequencies of 250 Hz, 500 Hz, 1000 Hz, and 2000 Hz. These frequencies encompass the fundamental frequencies and first few overtones of typical human speech, and, therefore, the NRC provides a decent and simple quantification of how well the particular surface will absorb the human voice.

**NRC Ratings**

- EcoFlex = 0.49
- EcoStrong = 0.79
- EcoWall = 0.70

---

### Slalom - EcoStrong Wall

#### Acoustic Panels

**ECOSTRONG WALL**

Acoustic Panel

EcoStrong Wall Panels are rigid, non-flexible, sound absorbent panels that produce good acoustic correction of midrange frequencies and attenuation of high frequencies. EcoStrong Wall Panels are ecologically friendly, recyclable and flame retardant, finished in Trevira CS, EcoFelt and PETfelt fabrics. NRC Rating = 0.79 (see below for details). Fire rating: CL1; Smoke: F1. Trevira CS: Class 1.

### Mounting Hardware

Self adhesive Velcro® included

### Options

- Magnets Only: Attach to EcoStrong Wall, for mounting to metal surfaces
- Magnets with Disk: The magnets attach to the EcoStrong Wall Baffle, and the steel wall disks mount to the wall, no spacer
- Magnets with Spacer: Spacer depth 4”
- Suction Cups (for glass): The suction cups mount to the EcoStrong Wall Baffle.

### NRC – Noise Reduction Coefficients

The Noise Reduction Coefficient (NRC) is a scalar representation of the amount of sound energy absorbed upon striking a particular surface. An NRC of 0 indicates perfect reflection; an NRC of 1 indicates perfect absorption. In particular, it is the average of four sound absorption coefficients of the particular surface at frequencies of 250 Hz, 500 Hz, 1000 Hz, and 2000 Hz. These frequencies encompass the fundamental frequencies and first few overtones of typical human speech, and, therefore, the NRC provides a decent and simple quantification of how well the particular surface will absorb the human voice.
