Specifications

- Uprights, (1 $\frac{3}{16}$ " dia.) are slotted to accept up to 4 panels mounted at 90° angles.
- Base Plates: Steel, 9 $\frac{3}{4}$ " dia. or optional 12 $\frac{1}{2}$ " dia.; Aluminum Metallic finish.

The **Slalom** Modular Partition System consists of multiple panels spanning between aluminum uprights for dividing and defining space.

Slalom can be configured into a series of curves, straight runs and corner partitions with up to 4 intersecting panels per upright. **Slalom** provides a stable yet easily re-configurable partition system.

Specifications

- Panel Finishes: Fireproof, self-extinguishing PVC and EcoFlex; Micro-Perforated Steel.
- Standard Panel Size: 39"w x 21½"h.
- Panel curvature is determined by moving the uprights closer or farther apart.
- PVC: ½" thick panels deliver virtually unlimited curvature from 0° to 360°.
- PVC Striped Translucent: white, 2" wide, screened onto translucent PVC panel.
- Steel panels are semi-flexible with the minimum radius of approximately 24".
- Panels are connected with translucent plastic clips.

Model	Description	Size	List* (Per Panel)	Est. Ship Wt.
Acoustic Panel Selections - Rigid, Non-Flexible				
EcoStrong panels are rigid, non-flexible, sound absorbent panels . Ideal for areas requiring more stability; can be configured in straight runs and perpendicular intersections. EcoStrong panels are ecologically friendly and produce good acoustic correction of midrange frequencies and attenuation of high frequencies. EcoStrong panels are finished in Trevira CS, EcoFelt and PETfelt fabrics. Panels are flame retardant and recyclable. NRC Rating = 0.79 (see page 119 for details). Fire rating: CL1; Smoke: F1. Trevira CS: Class 1.

NRC – Noise Reduction Coefficients

The Noise Reduction Coefficient (NRC) is a scalar representation of the amount of sound energy absorbed upon striking a particular surface. An NRC of 0 indicates perfect reflection; an NRC of 1 indicates perfect absorption. In particular, it is the average of four sound absorption coefficients of the particular surface at frequencies of 250 Hz, 500 Hz, 1000 Hz, and 2000 Hz. These frequencies encompass the fundamental frequencies and first few overtones of typical human speech, and, therefore, the NRC provides a decent and simple quantification of how well the particular surface will absorb the human voice.

NRC Ratings

EcoFlex = 0.49

EcoStrong = 0.79

EcoWall = 0.70
